The Dell Networking S6000-ON switch is the industry’s first disaggregated hardware + software data center networking solution that empowers organizations to deploy modern workloads and applications designed for the open networking era. Organizations that benefited from utilizing the disaggregation model with their data center server platforms can now leverage even greater benefits from Dell open networking solutions. Organizations can take advantage of this disaggregated networking model using industry-leading hardware and a choice of leading network operating systems to simplify data center fabric orchestration and automation and accelerate innovation. These new offerings provide organizations the flexibility to transform their data centers and offer high-capacity network fabrics that are easy to deploy, cost-effective and provide a clear path to a software-defined data center. The Dell S6000-ON supports the open source Open Network Install Environment (ONIE) for zero-touch installation of alternate network operating system including feature rich Dell Networking OS.

Data center optimized
The Dell Networking S Series S6000-ON 10/40GbE top-of-rack (ToR) switch is purpose-built for applications in high-performance data center and computing environments. Leveraging a non-blocking switching architecture, the S6000-ON delivers line-rate L2 and L3 forwarding capacity to maximize network performance. The compact S6000-ON design provides industry-leading density of 32 ports of 40GbE or 96 ports of 10GbE\(^1\) and eight additional ports of 40GbE to conserve rack space while enabling denser footprints and simplifying migration to 40Gbps in the data center core. In addition, the S6000-ON incorporates multiple architectural features that optimize data center network flexibility, efficiency and availability, including redundant, hot-swappable power supplies and fans. S6000-ON supports feature rich Dell Networking OS, VLT, network virtualization features such as VRF-lite, VXLAN Gateway, support for Dell Embedded Open Automation Framework.

Key applications
- High-density 10/40GbE ToR server aggregation in high-performance data center environments
- Large deployments in conjunction with the Dell Z9000, creating a non-blocking\(^2\) 10/40GbE data center network design

Additional applications:
When running the Dell Networking OS9, Active Fabric™ implementation for large deployments in conjunction with the Dell Z Series, creating a flat, two-tier, non-blocking 10/40GbE data center network design
- Small-scale Active Fabric implementation via the S6000 switch in leaf and spine along with S Series 1/10GbE ToR switches enabling cost-effective aggregation of 10/40GbE uplinks
- iSCSI storage deployment including DCB converged lossless transactions
- High-performance SDN/OpenFlow 1.3 enabled with ability to inter-operate with industry standard OpenFlow controllers
- As a high speed VXLAN Layer 2 Gateway that connects the hypervisor based overlay networks with non-virtualized infrastructures

\(^1\) Using QSFP+ breakout cables (available separately)
\(^2\) Performance rated over aggregate operation and with average packet transfers greater than 200 bytes
Key Features - General

- 1RU high-density 10/40GbE ToR switch with 32 ports of 40GbE (QSFP+) or 96 ports of 10GbE and eight ports of 40GbE with OS support
- Up to 2.56Tbps of switching I/O bandwidth (full-duplex) and available non-blocking switching fabric delivering line-rate performance under full load with sub 600ns latency
- Redundant, hot-swappable power supplies and fans
- I/O panel to power supply airflow or power supply to I/O panel airflow
- Supports the open source ONIE for zero-touch installation of alternate network operating systems
- Tool-less enterprise ReadyRails™ mounting kits reduce time and resources for switch rack installation
- Power-efficient operation up to 45°C helps reduce cooling costs in temperature-constrained deployments

Key features with Dell Networking OS9

- Scalable L2 and L3 Ethernet switching with QoS and a full complement of standards-based IPv4 and IPv6 features, including OSPF, BGP and PBR (Policy Based Routing) support
- VRF-lite enables sharing of networking infrastructure and provides L3 traffic isolation across tenants
- Increase VM Mobility region by stretching L2 VLAN within or across two DCs with unique VLT capabilities like Routed VLT, VLT Proxy Gateway
- VXLAN gateway functionality support for bridging the nonvirtualized and the virtualized overlay networks with line rate performance.
- Embedded Open Automation Framework adding automated configuration and provisioning capabilities to simplify the management of network environments. Supports Puppet agent for DevOps
- Modular Dell Networking OS software delivers inherent stability as well as enhanced monitoring and serviceability functions.
- Enhanced mirroring capabilities including 1:4 local mirroring, Remote Port Mirroring (RPM), and Encapsulated Remote Port Mirroring (ERPMM). Rate shaping combined with flow based mirroring enables the user to analyze fine grained flows
- Jumbo frame support for large data transfers
- 128 link aggregation groups with up to 16 members per group, using enhanced hashing
- Converged network support for DCB, with priority flow control (802.1Qbb), ETS (802.1Qaz), DCBx and iSCSI TLV support
- Fastboot feature enables min-loss software upgrade on a standalone S6000 without VLT/stacking
- S6000-ON supports Routable RoCE to enable convergence of compute and storage on Active Fabric
- User port stacking support for up to six units

**Physical**

- 32 line-rate 40 Gigabit Ethernet QSFP+ ports
- 1 RJ45 console and management port with RS232 signaling
- 1 USB 2.0 type A storage port
- 1 USB 2.0 type B console port
- Size: 1 RU, 1.71 x 17.08 x 18.11”
- Weight: 16.12 lbs (7.32 kg)
- Power supply: 100–240 VAC 50/60 Hz
- Max thermal output 1265.9 BTU/hr (371W)°
- Max. power consumption: 371 watts
- Typ. power consumption: 220 watts
- Max operating specifications:
  - Operating temperature: 32°F to 113°F (0°C to 45°C)
  - Operating humidity: 10 to 90% (RH), non-condensing
- Max. non-operating specifications:
  - Storage temperature: –40°F to 158°F (–40°C to 70°C)
  - Storage humidity: 5 to 95% (RH), non-condensing
- Fresh Air Compliant to 45°C
- ReadyRails rack mounting system, no tools required
Redundancy
Hot swappable redundant power
Hot swappable redundant fans

Performance general
Switch I/O bandwidth: 2.56Tbs (full-duplex)
Forwarding rate: 1462Mpps
Latency: sub 600ns
Packet buffer memory: 12MB
CPU memory: 4GB

Performance with Dell Networking OS9

MAC addresses: 160K
ARP table: 128K
IPv4 routes: 128K
IPv6 hosts: 24K
IPv6 routes: 32K
Multicast hosts: 8K
Link aggregation: 16 links per group, 128 groups
Layer 2 VLANs: 4K
MST: 510 instances
VRF-Lite: 510 instances
LAG load balancing: Based on layer 2, IPv4 or IPv6 headers
Latency: Sub 600ns
QOS data queues: 8
QOS control queues: 12
QOS: Default 768 entries scalable to 2.5K
Ingress ACL: 2.5K
Egress ACL: 1K
